PROFESSIONAL SUMMARY

Flutter Mobile Developer with **4+ years of experience** delivering **scalable Android and iOS applications** across POS, wallet, and enterprise platforms. Recognized for **strengthening performance, stabilizing production releases, and accelerating delivery cycles** using Flutter, Dart, modern state management, and API-driven architectures. Brings early-career **field, systems, and team leadership experience** supporting nationwide enterprise deployments.

TECHNICAL SKILLS

Languages

- Dart, Kotlin, Java

Frameworks & SDKs

- Flutter, Android SDK, iOS SDK

State Management

- Bloc, Riverpod, Provider, GetX

Backend & APIs

- RESTful APIs, GraphQL, Firebase (Auth, Firestore, Cloud Functions, Messaging)

Architecture & Patterns

- MVVM, Clean Architecture, OOP

DevOps & Tooling

- Git, GitLab, CI/CD, Fastlane, Testing, Monitoring

Security

- JWT-based Authentication

Specialties

- Offline-first applications, Performance tuning, Responsive UI, Technical Documentation
-

PROFESSIONAL EXPERIENCE

Flutter Mobile Developer

Blutouch POS / SoftPOS App (Remote)

September 2023 – Present

- **Drove** the delivery of a real-time Flutter POS application supporting **1,000+ daily financial transactions** across multiple OEM devices.
 - **Boosted** transaction processing speed by **~30%** through rendering optimizations and efficient state handling.
 - **Executed** integrations with **5+ proprietary OEM APIs**, enabling device-level payment and security capabilities.
 - **Stabilized** production performance by resolving **~40% of device-specific crashes** through testing across **15+ hardware variants**.
 - **Established** offline transaction workflows, reducing failed transactions during connectivity loss by **25%**.
 - **Fine-tuned** UI behavior across **10+ screen sizes**, improving usability for field operators.
 - **Resolved** over **90% of compatibility-related incidents within SLA**, significantly reducing support escalations.
-

Flutter Mobile Developer

Skye Wallet (Remote)

September 2022 – August 2023

- **Shipped** wallet features used by **20,000+ active users** on Android and iOS.
 - **Rolled out** secure authentication and real-time data synchronization with Firebase, cutting login-related defects by **35%**.
 - **Powered** wallet funding, transfers, and transaction history via REST APIs handling **thousands of daily requests**.
 - **Accelerated** application startup time by **~25%** through dependency and widget lifecycle optimization.
 - **Lowered** post-release defects by **30%** by tightening testing and release validation processes.
 - **Sustained** a consistent **2-week sprint delivery cadence**.
-

Flutter Mobile Developer

Meritrade (Remote)

August 2021 – July 2022

- **Expanded** Flutter-based trading features for a platform serving **5,000+ monthly users**.
 - **Linked** mobile clients to backend services using REST and GraphQL, reducing data-handling errors by **20%**.
 - **Hardened** application security through JWT-based session management.
 - **Re-architected** application structure using MVVM and Clean Architecture, decreasing regression incidents by **~25%**.
 - **Reinforced** predictable sprint delivery through active Agile participation.
-

Flutter Mobile Developer

Diatron (Remote)

November 2020 – July 2021

- **Delivered** Flutter features supporting production Android and iOS releases.
 - **Applied** MVC and MVVM patterns, shortening developer onboarding time by **~20%**.
 - **Extended** application capabilities through third-party SDK and API integrations without performance degradation.
 - **Identified** and eliminated edge cases through unit testing, reducing production bugs by **15%**.
-

Junior Flutter Developer

Kumba Africa (Remote)

August 2019 – September 2020

- **Assisted** in delivering Flutter UI components across multiple client applications.
 - **Helped drive a 20% reduction in pre-release defects** by supporting testing and debugging efforts.
 - **Maintained** internal documentation to improve knowledge transfer within the team.
-

Field Support Officer → Technical Support Engineer → Team Lead (Contract)

NCR

May 2015 – July 2019

- **Team Lead, Technical Support (2018 – 2019)**
 - **Oversaw 20+ field engineers** across multiple regions, improving service coverage and response efficiency.
 - **Directed** incident triage and escalation workflows, **cutting average resolution time by 30%**.
 - **Supervised** nationwide installations and upgrades, ensuring SLA adherence.
 - **Managed** vendor engagement, documentation, and operational reporting for large-scale deployments.

- **Technical Support Engineer (2017 – 2018)**

- **Handled** advanced support for nationwide ATM and ERP deployments.
- **Installed, configured, and administered** Windows and Unix servers across physical and virtual environments.
- **Partnered** with internal engineering teams to resolve complex system failures.

- **Field Support Officer (2015 – 2017)**

- **Executed** on-site support for ATM and enterprise systems, addressing hardware, software, and network issues.
 - **Performed** installations, upgrades, and preventive maintenance, increasing system uptime and reducing repeat incidents.
Recorded service activities and incident reports to support compliance and operational tracking.
-

EDUCATION

Diploma – Electrical Engineering

Yaba College of Technology

Major: Electrical/Electronics Engineering | Minor: Computer Science
